

Masks Make you Sick!

Did you know?

A virus - invisible through a regular microscope

- Masks work the way a chain link fence keeps out mosquitoes. What do you use for mosquito screens? Smoke and vapor, particles much larger than viruses, easily travel through your mask.
- Virologists wear space suits with oxygen tanks instead of masks.
- Masks - perfect breeding ground for **multiplying germs**: warm, moist cloth.
- Breathing these multiplied germs onto others and into your body causes strep and staph infections.
- Oxygen is essential to a healthy immune system – **wearing a mask weakens the immune system.**
- Trapped carbon dioxide poisons you.
- Masks make people sick – **Jurisdictions without mask rule have fewer COVID-19 patients.**
- Masks are implicated with a lot of deaths during the Spanish Influenza due to causing pneumonia.

The pharma industry

WANTS YOU SICK! How else are they going to add to their billions? They sell masks, tests, and vaccines.

80% of mainstream media's income comes from big pharma ads – they are paid to give false information.

99.9+ % worldwide have survived COVID-19 – lockdown or no lockdown including the US, and Sweden (no lockdowns)

A healthy immune system keeps you safe! Cut sugar, load up on vitamins, especially D. Also on minerals like magnesium, eat nutritious, whole, organic foods, avoid toxins and processed foods.
