

LOCKDOWNS DON'T SAVE

THEY KILL

“Popular media focused on absolute numbers of COVID-19 cases and deaths independent of context. There has been a sheer one-sided focus on preventing infection numbers,” says Dr. Joffe. “It turned out that the costs of lock downs are at least 10 times higher than the benefits. That is, lock downs cause far more harm to population well-being than COVID-19 can.”

You have to ask yourself, who benefits from a destabilized world? Who benefits from chaos on the streets, from anarchy, from financial despair, from psychological trauma? ... In some parts of this country, suicide rates are up 600%.

I speak to my colleagues in emergency rooms — the amount of child abuse and spousal abuse they've seen is absolutely ridiculous. The amount of collateral damage from preventable illnesses, like heart disease and cancer that are skyrocketing because people are not getting access to routine care.

A lot of people weren't getting elective surgeries on time. So, there's been a lot of collateral damage. The shutdown is killing more people than the virus. The virus is not dangerous if you approach it correctly. If you treat it in the right timeframe, it's no different than a bad flu. You can deal with it. You don't have to shut down the world.” Dr. Vladimir Zelenko

TIRED OF THE ANTISOCIAL LOCKDOWNS AND RESTRICTIONS?

YOU'RE NOT ALONE.

Lockdowns and restrictions are harming people more than SARS-COV-2 *which has not been properly isolated anywhere in the world.*

Government and media induced fear programs have led people to:

- Ask to be euthanized because they couldn't bear the loneliness.
- Suicide
- Alcohol and drug abuse and corresponding death
- Loneliness and mental instability
- Long-term scars for children and adolescents
- Psychological irrationality some will never recover from, like being terrified of people

Albert Einstein:

“The definition of insanity is to do the same over and over and over again, expecting different results.”

Imposing restrictions and lockdowns over and over and over again, expecting different results, is insanity.
