

COVID -19 VACCINE – IT'S YOUR CHOICE

DID YOU KNOW? The Covid-19 vaccine will not prevent you from getting sick with Covid or infecting others (as stated by vaccine companies, World Health Organization, Dr. Fauci and Dr. Hanley)

Therefore, **government restrictions will likely remain in place indefinitely** even after people are vaccinated. This includes travel, gathering restrictions, physical distancing, mandatory mask and self-isolation.

DID YOU KNOW? 60 years of development of Corona virus vaccines were **unsuccessful** because they were shown to cause harm or death to the elderly or compromised, and to women's reproductive health. Test animals suffered severe illness or death after exposure to the actual virus.

Most vaccines take up to 10 years for approval. Health Canada has fast-tracked the Covid-19 vaccine without overseeing the trials and without requiring the usual animal tests. No long term studies have been done.

DID YOU KNOW? Covid 19 vaccine trials did not include several groups: the old, weak, immune compromised, people with comorbidities, pregnant women, children/teens.

The vaccine does not use the usual dead or live virus. It's synthetically-produced, genetic material totally foreign to your body and its long-term effects are unknown.

If you are harmed by the Covid-19 vaccine, **the manufacturers have indemnity and cannot be sued.**

DID YOU KNOW? The vaccine contains PEG lipids used in drugs. They are known to cause allergies, auto-immune disease and liver damage.

As with the flu, **the vaccine protection is unlikely to last longer than a year** due to constant virus mutation.

Covid outbreaks and death after vaccination are observed around the globe. In Norway, Belgium, Italy and California some vaccinations have been paused.

Follow the money. Vaccine manufacturers are profiting while natural, inexpensive, preventative measures and treatments are being suppressed.

80% of mainstream media income is from pharma ads.

Covid survival rate >99.9% worldwide – with and without lockdowns. Check the math.
